

## Art Tasks:

This week in science you have been asked to collect leaves for your scientific observations. Whilst you are out and about, use this opportunity to collect lots of other items too for some nature inspired activities! Pick and choose the ones you would like to do.

	<p>Create a hanging mobile! You could paint them, like this example, or leave them natural. Can you practise tying the string yourself to attach each item securely?</p>
	<p>Arrange leaves and natural objects to make an animal or another design of your choice.</p>
	<p>Create a crown or bracelet with the items you collect.</p>
	<p>Use twigs and coloured thread to make the first letter of your name. Ask an adult to help you attach the twigs and then try wrapping around the string independently.</p>
	<p>Explore mark making with your own nature-made paint brushes. What patterns and designs can you create?</p>
