

Bumblebees and Dragonflies' Learning Adventure

Terms 1 and 2

Our Guiding Stars

(Learning skills)

Our Wild World.

Our Exploration Backpack (Essential Curriculum Skills)

I can use number to solve addition, subtraction, multiplication and division problems.

I can organise my writing around a theme.

I can present information in different ways.

I can recognise how a place has changed and is still changing.

I can describe the physical features of a place.

I can compare and group materials together, according to whether they are solids, liquids or gases

I can describe events from periods of history.

I know some facts about the lives of people and events from the past.

I can collect information and plan my ideas for a piece of art.

I know what has gone well and what can be improved.

On our adventure we might discover...

Bumblebees and Dragonflies will be looking at how extreme weather is created and how it affects different parts of the world.

We will look at how tectonic plates can shift resulting in earthquakes and volcano eruptions and how a famous eruption changed the lives of people in one particular country.

The children will get to form their own 3D volcano and watch it erupt, and explore the effect of temperature on substances, in which materials change state.

Our Adventure Starts...

With the creation of a model Earth.

An adventure highlight...

Making a hurricane in a jar.

Our Explosive Ending

Exploding volcanoes will be made by the children.
