

You might want to draw some sketches. This could be a sketch of your dream house, a school of the future, a football stadium, a building from the past, an airport or a fantasy building. You might want to think big and plan a whole new town.

Once you've thought through an idea – you might want to have a go at making a model. This could be a junk model made from boxes and other materials you've got at home or you could use something like Lego.

You might want to make a castle, a house, a theme park, a playground, a space station or a fairy palace. Think about the structure and shape. How will you fix the different parts together? How you will decorate your creation? Can you add some moving parts?

You could create a real life den or teepee in your bedroom or in the garden. Or you could create a small model out of natural materials.

You will have the chance to share your creations at your class Zoom session on Friday 12th February. It doesn't matter if your creation isn't finished. Don't forget to send in photos of your work to the year group emails too. Good luck and have fun.
