

CODING: SESSION 4

CodeCombat: Escape
the Dungeon

Friday, 26th February 2021

This week your tutorial is going to be:

CodeCombat: Escape the Dungeon

Choose your hero and code your way through the ogre patrols, lava pits, and laser beams of Kithgard Dungeon. Level up, earn gems and loot magic items to unlock new programming powers!

You can access the tutorial by clicking on one of the links on the previous page.

[CodeCombat: Escape the Dungeon](#)

Choose your hero and code your way through the ogre patrols, lava pits, and laser beams of Kithgard Dungeon. Level up, earn gems and loot magic items to unlock new programming powers!

I'm a student

I'm ready to code!

Click on 'I'm a student' but ignore the Class Code area.

Start at the golden arrow and follow the instructions on the screen.

CodeCombat has a Classroom Version!

Enter Class Code:
Don't have one? Ask your teacher!

You will start off by choosing your hero out of the first four.

You can also choose what programming language you would like to use: I suggest that you use Python.

Navigate your way through the game, following the instructions and using your knowledge of coding learned so far.

Have fun!
